Message from the Guest Editors

Older adults are known to have a higher prevalence of multi-morbidity than younger adults. The complexity of multi-morbidity in connection with the high demands of health care as well as with polypharmacy result in a major burden on the older population, health caregivers and the health care system. Thus, as rapid population aging has become a global public health issue, determining how to provide appropriate health promotion, health care, and health services for older people to decrease their burden of diseases and increase their well-being is one of the most important topics globally.

Studies of the status, predictors, and improvement strategies of health care or health service utilization and health outcomes among older people can provide helpful information to plan healthcare interventions for older people and/or suggest appropriate health policies for the aging population. Although numerous studies have been conducted, more evidence and discussions are needed focused on this issue. This forms the motivation to set up the Special Issue of the journal.

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (Public Health, Environmental and Occupational Health)
