submissions:

15 October 2024

Message from the Guest Editor

I am organizing a Special Issue on “Trace Elements in Nutrition: A Health Perspective for Future Direction in Human Nutrition” in the *International Journal of Environmental Research and Public Health* (IJERPH).

It is essential to reconnect food and agriculture. This Special Issue will feature new research that advances our understanding of trace elements in human nutrition. It will also focus on nutrition healthy propriety of innovative food products from sustainable agriculture to support a nutritious diet from farm to fork as well as innovative diet. There is a need for more sustainable foods that contribute to a lower environmental impact in their production. Biodiversity, diet, and health move the field forward. The issue is open to original research, review articles, short reports, brief commentaries, methodological papers, and meta-analyses related to the impact of trace elements in nutrition. The listed keywords suggest a few of the many possible subject areas.

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (Public Health, Environmental and Occupational Health)
