Message from the Guest Editors

The *International Journal of Environmental Research and Public Health* is planning on publishing a Special Issue to mark the 20th Anniversary of the 9/11/2001 attacks on the World Trade Center. The first aim of the edition is to highlight research on non-rescue/recovery workers, which includes residents of downtown Manhattan, people who worked in the area on 9/11/2001, passersby, and people who were children on 9/11/2001, enrolled in schools, or school staff. The second aim includes a continued explication of the ongoing interactions between physical and mental health (especially PTSD), aging-related conditions, advances in the treatment of 9/11 conditions, the longitudinal course of previously reported conditions, and potential emerging conditions (e.g., heart disease, autoimmune diseases, cognitive impairment, cancer, and late sequelae). Quality of life, functioning, and unmet health care needs would also be in the purview of this Special Issue on the 9/11 disaster. The third aim includes the investigation of the occurrence and consequences of positive experiences related to the 9/11 disaster, such as post-traumatic growth.

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (Public Health, Environmental and Occupational Health)
