### Message from the Guest Editor

Dear Colleagues,

Mood and anxiety disorders are characterized by a variety of neuroendocrine, neurotransmitter, and neuroanatomical disruptions.

The identification of reliable biomarkers (applying neuroimaging, genetic, or neurochemical approaches) and their impact on cognitive functions and psychiatric disorders is crucial to improve effective treatments.

This Special Issue of the *International Journal of Environmental Research and Public Health* aims to present a collection of studies detailing the most recent advancements in the field of neurosciences and mood and anxiety disorders.

Authors are invited to submit original research and systematic and narrative reviews that can help to make advances in this field.

Dr. Filippo Manti

## Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.

**Journal Rank:** CiteScore - Q1 (Public Health, Environmental and Occupational Health)
