Message from the Guest Editors

Mental health is a human right, and it is important for social and occupational functioning and participation. Globalization and technological advancement have created new avenues and opportunities with regard to mental health services. The COVID-19 pandemic has also provided new insights into the relevance of mental health and why persons with disabilities should be prioritized in the provision of services. While this ‘new knowledge’ and understanding exist, it is not apparent what must be done to realize inclusive mental healthcare services for persons with disabilities, especially in low-resource settings. Additionally, proposed interventions often preclude the voices of persons with disabilities and their family care givers. This Special Issue is an open call to document and highlight evidence how equitable mental healthcare for persons with disabilities could be realized. We seek novel ideas that address the problem of mental health for persons with disabilities in collaboration with the affected individuals and their families.

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (Public Health, Environmental and Occupational Health)
