submissions:

**closed (31 December 2023)**

### Message from the Guest Editor

Dear Colleagues,

Drug therapy in children is essential to reduce mortality and morbidity. Unfortunately, many medicines are used inappropriately, which may result in toxicity or drug resistance. The study of the utilisation of medicines in paediatric patients is linked to the need for more rational prescribing.

This Special Issue welcomes papers from any paediatric setting that describes the use of medicines in any paediatric age group. It is not focused on either off-label or unlicensed drug use.

We welcome studies:

- Looking at either one group of medicines or all medicines.
- Addressing drug utilisation in any paediatric age group.
- Addressing drug utilisation in primary, secondary or tertiary care.
- Evaluating whether medicines are used rationally.
- Evaluating practice in relation to guidelines regarding the use of medicines.
- From all countries, as different medicines are needed in different parts of the world.

Original research articles and reviews are welcome.

## Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPus / SciFinder, and other databases.

**Journal Rank:** CiteScore - Q1 (Public Health, Environmental and Occupational Health)
