Deadline for manuscript  
submissions:

**closed (31 October 2022)**

### Message from the Guest Editor

The study of mental health and well-being in relevant developmental stages has been receiving more attention in recent years. Previous studies show that mental disorders and psychological difficulties may arise during childhood and adolescence. In this regard, the study of mental health and subjective well-being during adolescence, in addition to other psychological measures, could be relevant with the aim to prevent other severe pathologies. Therefore, studies including phenotypically characterized samples of children and adolescents before they develop clinical problems are still needed in order to integrate different measures, including genetic, brain, psychometric, and neurobehavioral markers, that may help us to articulate prophylactic and more effective interventions.

This Special Issue focuses on psychological aspects related to children, teenagers, and young adults. This Special Issue seeks research papers on various aspects of mental health development. We especially encourage the submission of interdisciplinary work and multicountry collaborative research.

an Open Access Journal by MDPI

## Editor-in-Chief

**Prof. Dr. Paul B. Tchounwou**  
RCMI Center for Urban Health  
Disparities Research and  
Innovation, Richard N. Dixon

University, Baltimore, MD 21251,  
USA

## Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.

**Journal Rank:** CiteScore - Q1 (Public Health, Environmental and Occupational Health)
