submissions:

closed (15 April 2023)

Message from the Guest Editor

Dear Colleagues,

The first Special Issue on Neuroprotection and Treatment in Intensive Care and Perioperative Medicine was a great success. We received a handful of exciting papers focusing on this crucial topic, and we are now ready to continue our project. In this second Special Issue in the *International Journal of Environmental Research and Public Health*, we would like to focus on:

- Postoperative delirium, with particular attention to interventions aiming at reducing its incidence.
- Neuroprotective compounds and their role in the ICU and the perioperative setting.
- Cognitive impairment and dementia following ischemic stroke and cardiac arrest.
- Role of neuroprotection in patients suffering from traumatic brain injury.
- New findings on the mechanisms of neuroprotection in the preclinical setting.

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (Public Health, Environmental and Occupational Health)
