Message from the Guest Editors

Physiotherapy and osteopathy are rapidly growing interdisciplinary sciences. The currently promoted healthy lifestyle is instigating a search for effective and noninvasive ways to regain and improve health. In the field of gynecology and obstetrics, the use of physiotherapy and osteopathy is gaining in popularity as a supportive and alternative treatment. The purpose of this Special Issue is to highlight the benefits and emphasise the importance of physiotherapy and osteopathy in gynecology and obstetrics to improve women's health. The Special Issue can also serve as a forum to share your own experiences and challenges in developing strategies to bring physiotherapy and osteopathy closer to patients in healthcare systems.

We are convinced that this Special Issue, supported by renowned academics, will have a significant impact on both the scientific community and the practitioners of physiotherapy and osteopathy. Together, we can take a major step forward in helping to promote high standards of physiotherapy and osteopathy worldwide.

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (Public Health, Environmental and Occupational Health)
