Author, Massillon, OH 44646, USA

Deadline for manuscript
submissions:

31 December 2024

Message from the Guest Editors

Dear Colleague,

Called the great biogeochemical cycles of life by natural and environmental scientists and the great chain of being by mystics and poets, it is clear that humanity depends on the stable patterns associated with these cycles for all that we are and hope to be. Yet, disruptions to these cycles both large and small can have profound impacts upon health and well being, and these impacts can become magnified by social and economic inequities in ways that have devastating impacts for human health and well-being and that further feed back into cycle disruptions. This issue will explore those systems' relationships through original research and review oriented, qualitative works.

This issue will seek submissions that highlight these issues, contribute new research understanding and develop thought pieces that reflect on current work in this area while challenging the reader to contribute to a better understanding of these topics as a system.

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (Public Health, Environmental and Occupational Health)
