submissions:

closed (4 December 2023)

Message from the Guest Editor

Depression results from the complex interplay between biological, psychological, and social factors and may significantly impair individual, relational, and social functioning in several/all life domains. Thus, depression represents a global priority, requiring multidisciplinary research efforts in order to develop comprehensive and adequate strategies to prevent depression and/or illness escalation, to manage this condition and to effectively promote individuals' wellbeing.

Responding to this need, the present Special Issue aims to provide multidisciplinary, updated and advanced contributions addressing biological, psychological and social risk and protective factors to be used to prevent/manage depression and promote mental health.

This Special Issue seeks original, high-quality research targeting a variety of populations and/or different contexts (e.g., including but not limited to adults in the work context, youths in the educational context, and medical patients in the healthcare context).

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (Public Health, Environmental and Occupational Health)
