### Message from the Guest Editor

This Special Issue will be a collection of systematic reviews, meta-analyses, and exceptional narrative reviews describing the state of the art and temporal development of a diverse set of topics related to skin health. These topics may comprise, for example, effects of UV radiation on different forms of skin cancer, determinants of allergic contact dermatitis, monitoring of temporal trends in skin diseases, geographical comparisons of disease frequency parameters of skin diseases, impact of artificial UV radiation on skin diseases, analysis of risk factors for rare skin diseases, allergic skin reactions following pharmaceutical interventions, skin toxicology relevant for regulatory purposes, quality of life of patients with chronic skin diseases, prevention of skin diseases, and public health impact of skin diseases. Other timely topics with a clear focus on non-clinical aspects of skin health are also welcome.

## Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.
