submissions:

31 October 2024

Message from the Guest Editor

Dear Colleagues,

The behavioral patterns established during adolescence and youth determine not only these young people's current health status, but also their risk of developing chronic diseases during adulthood. As evidenced in the extant literature, many behaviors that can affect health and well-being later in life start or peak during these younger years. Therefore, more research is needed to further our understanding of these young people's behavioral health issues, be it persisting risk behaviors or emerging new problems, so as to help promote positive health behaviors and decrease preventable risk behaviors.

With that in mind, this Special Issue welcomes submissions addressing any types of health/risk behaviors in this young population. Examples include, but are not limited to: alcohol, marijuana, and other drug use; driving under the influence; smoking prevention/cessation; tobacco control; e-cigarette/IQOS use; bullying; intimate partner violence; date rape; sexual risk behavior; HIV/AIDS/STI prevention; physical activity/inactivity; healthy/unhealthy diet; disordered eating behavior; body image; gambling; Internet/smartphone addiction.

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (Public Health, Environmental and Occupational Health)
