Deadline for manuscript  
submissions:

**closed (3 April 2023)**

### Message from the Guest Editor

Dear Colleagues,

Stroke is one of the most common causes of death and long-term disability. Over the last decade, there has been a marked decline in mortality resulting from stroke throughout much of Europe and the Western world, reflecting positive trends in the prevention of cardiovascular disease as a whole. These trends result from early implementation of primary prevention strategies, improved treatment and extensive rehabilitation treatment. As for stroke rehabilitation, there are many approaches including medications, physical therapy, technology-assisted training, cognitive or emotional treatment. In this special issue, authors are invited to submit a wide range of papers on evaluation, treatment techniques, and therapeutic strategies for patients with stroke.

## Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.

**Journal Rank:** CiteScore - Q1 (Public Health, Environmental and Occupational Health)
