Deadline for manuscript
submissions:

closed (14 June 2023)

Message from the Guest Editor

Global heating is generating increasing risks to all facets of human life, work, wellbeing, health and safety. The direct impact of living and working in a hotter atmosphere engenders specific risks. This Special Issue, will explore the impact of climate change on workplace wellbeing across a range of industries. We will investigate the physical impact of climate change, including the adequacy of work-to-rest recommendations and expectations, in labour-intensive, outdoor workplaces. For workplaces with a focus on health, disability and ageing, we will explore the physical and psychological impacts on workers and their clients. Finally, we will identify potential and actual public and occupational health responses in the face of climate change to support work and population health, safety and productivity across the broad spectrum of human interaction with the environment. All papers that explore this human interaction with climate change, including experimental studies, opinion and reviews, are welcome.

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (Public Health, Environmental and Occupational Health)
