**Dr. Jessica Yasmine Islam**

Cancer Epidemiology Program, H. Lee Moffitt Cancer Center and Research Institute, Tampa, FL 33612, USA

Deadline for manuscript submissions:

**closed (7 April 2023)**

### Message from the Guest Editors

Understanding and addressing the co-occurring epidemics of chronic diseases, mental health conditions, and COVID-19 are critical to our management of current and future challenges within the public health, clinical, and scientific communities. We broadly conceptualize chronic diseases to include cardiovascular diseases, diabetes and other metabolic diseases, cancer, chronic pulmonary diseases, HIV/AIDS, and auto-immune conditions.

We present this Special Issue as a forum for collecting studies on these topics that can bridge research with practical programmatic and policy implications. We welcome articles concerning the results of epidemiologic studies that apply structural frameworks and syndemic theories to examine these associations, health services research to examine inequities in access and linkages to mental health and/or chronic disease care, and intervention and policy approaches to address chronic disease and mental health inequities. We especially welcome submissions from first authors of historically marginalized and excluded groups, as well as students.

## Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPus / SciFinder, and other databases.

**Journal Rank:** CiteScore - Q1 (Public Health, Environmental and Occupational Health)
