Message from the Guest Editor

Dear Colleagues,

Victimization through all forms of violence in close relationships constitutes a fundamental violation of both adults' and children's rights and integrity. Childhood adversity, such as exposure to intimate partner violence and child abuse, can have detrimental effects for the health and wellbeing both in the short term and in later adult life. This Special Issue welcomes contributions on the prevention of IPV and CA ranging from universal to indicated measures, for example, policy measures including changes to the law and guidance for practitioners, new organizational approaches, and research-based methods for prevention, assessment, support, and treatment. Contributions highlighting issues of interacting inequalities, diversity, and special vulnerabilities are especially welcome.

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (Public Health, Environmental and Occupational Health)
