### Message from the Guest Editors

Dear Colleagues,

Human activity in the labor market involves diverse workers striving to improve their quality of life. Health promotion strategies are vital for creating safe, sustainable work environments that foster well-being.

Workplace conditions directly impact health and safety. Developing physical, organic, and socio-relational aspects is crucial for promoting well-being across genders. Key elements include safety, freedom of negotiation, equity, and dignity.

Promoting workplace health requires support from various societal sectors. Socio-political actions should ensure equal opportunities, safety, and positive social relations. Efforts must include collective and individual interventions, labor negotiations, and creating healthy environments. Additionally, global policies should promote decent, sustainable, and healthy work for vulnerable groups while upholding human rights in the workplace.

This Special Issue underscores the ongoing importance of promoting health and safety in the workplace. Sustained attention from the scientific community is essential. Promoting these conditions benefits workers, their families, and contributes to collective well-being.

## Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPus / SciFinder, and other databases.

**Journal Rank:** CiteScore - Q1 (Public Health, Environmental and Occupational Health)
