Message from the Guest Editors

If we are to genuinely improve health care management and guidance, research on health services is a must. We have now made significant advances in promoting the integration and sustainability of health and health equity and will continue to make more progress in this area. The awareness of the role health services play in providing individuals with opportunities to determine their health status has grown ever stronger, and the advantages of it in driving changes in public health have become increasingly clear.

This Special Issue invites expert manuscripts that focus on the following topics: the design, implementation, and evaluation of health services, including digital services; practical innovations in health care systems; evidence-based research to improve the health outcomes in communities; and healthcare management to make health systems sustainable.

We look forward to receiving your contributions, both qualitative and quantitative, regarding emerging issues in health services. Systematic reviews and meta-analyses will also be considered for inclusion.

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (Public Health, Environmental and Occupational Health)
