Message from the Guest Editor

We are organizing a Special Issue on the Assessment of ADHD and its related symptoms in the International Journal of Environmental Research and Public Health. The international Journal is a peer-reviewed scientific journal publishing articles and communications in the interdisciplinary field of environmental health sciences and public health.

This Special Issue aims to document the assessment of adult ADHD and its related symptoms. Besides being open to different contexts, we also welcome contributions from across the globe. I would like to stress that negative results that contribute to our understanding of adult ADHD are also welcome. From my point of view, these as well as positive results contribute to the scientific progress in this field of research. The keywords presented are intended as a broad guideline for articles.

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (Public Health, Environmental and Occupational Health)
