Message from the Guest Editors

Dear Colleagues,

This issue will focus on the screening and assessment of older adults, including cognitive assessment and risk assessment that predicts negative outcomes of older adults, such as hospitalization, death, and institutionalization, as well as how to improve efficiency of discharge planning using tools to predict patient outcomes.

It will also focus on screening tools and short dementia assessments and more efficient use of hospital services for older adults by improving our assessment techniques.

Prof. Dr. David William Molloy

Dr. Rónán O’Caoimh

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (Public Health, Environmental and Occupational Health)
