Message from the Guest Editors

In the AgriFood field of research, economics, finance, and engineering have historically been developed as distinct, non-overlapping sciences. However, it is increasingly clear that sustainable agriculture and food production cannot be achieved without a simultaneous focus on the above-cited disciplines.

Agricultural sustainability is essential for the continued viability of communities and territories. For this reason, the societal challenge consists of finding a balance between the economic, financial, and managerial practices and environmental and social needs.

This Special Issue seeks to demonstrate the important role that interdisciplinary approaches can play towards a sustainable future. It is intended to propose strategies and methods for approaching sustainable goals and thus enhance our ability to develop the AgriFood 4.0 era.

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (Public Health, Environmental and Occupational Health)
