Deadline for manuscript
submissions:

closed (31 December 2022)

Message from the Guest Editors

Despite the progress in the diagnosis and treatment of cardiovascular diseases in recent years, they are still the leading cause of death in the world. *IJERPH* is planning to launch a Special Edition entitled “Advances in Cardiology and Vascular Health”, addressing current problems in cardiovascular disease. The purpose of this issue is to provide additional opportunities to present the results of original research and reviews in this field. We would like to invite all of you to contribute to this Special Issue. We are interested in clinical studies, particularly on patients with coronary heart disease, heart failure, atrial fibrillation, and various vascular complications, yet the title of this Special Issue allows the submission of papers on a much wider spectrum of topics related to cardiovascular diseases. Original papers as well as valuable reviews presenting new achievements in both cardiac electrotherapy and interventional cardiology are also appreciated and welcome. The peer-review process is efficient and productive, and the articles are published online as soon as they are accepted, without waiting for other papers in the Special Issue.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (Public Health, Environmental and Occupational Health)
