Nevada, Reno, NV 89557, USA

Deadline for manuscript
submissions:
closed (15 June 2022)

Message from the Guest Editor

The International Journal of Environmental Research and Public Health seeks articles and reviews for a Special Issue examining the many topics that lend themselves to ongoing anxieties about a predominantly digital, computer-mediated culture.

This Special Issue will celebrate methodological and theoretical plurality, with the primary goal being to publish an excellent collection of research and theory that advances thinking about topics related to the dark side of computer-mediated communication and digital engagement.

To that end, the editor will accept manuscripts featuring scientific and social scientific research using quantitative and/or qualitative research methods; critique-oriented methods such as rhetorical, cultural, or media criticism; and scholarship that is highly creative, especially as it advances theory. The goal is to feature not only scholarship that generates empirical findings but also work that advances thinking regarding the benefits and threats that social media and other forms of digitally-mediated communication create for individuals, relationships, organizations, and cultures.

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (Public Health, Environmental and Occupational Health)
