University of Cantabria, 39005  
Santander, Spain

Deadline for manuscript  
submissions:

**closed (31 August 2021)**

### Message from the Guest Editors

Econometric analysis is a constantly expanding area of knowledge that is providing researchers with better tools to analyze different economic problems. These advances have occurred regardless of the type of data used. They can be found in timeseries analysis, where unit root tests and cointegration analysis play an essential role, as well as in the case of using cross-sectional data—the increasing use of spatial econometric techniques is a good example. Finally, the creation of new databases has led to a great growth in the use of panel data techniques.

The objective of this Special Issue is to collect applications that use recent advances in econometrics, all applied to the field of health economics. The Editors encourage presentations that address new econometric techniques to analyze and predict the evolution of different aspects of health economics.

## Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPus / SciFinder, and other databases.

**Journal Rank:** CiteScore - Q1 (Public Health, Environmental and Occupational Health)
