Message from the Guest Editor

Atrial fibrillation (AF) is a well-known disease that affects a large share of patients treated by the medical community and is, therefore, a public health issue. Despite the existence of clear guidelines, it is not one of your "everyday" problems with a straightforward, one-size-fits-all treatment plan, but rather a complex disease necessitating different approaches depending on which side of it you are looking at: a nuisance to daily life in patients with paroxysmal or persistent AF leading to recurring cardioversions, ablations, or chronic medical therapies; a major stroke risk and cause; a complicator of post-operative hospital stays; a cause for emergency department visits; up to a negative impactor on critical care and intensive care—AF shows its facets in many different ways.

"Novel insights" concerning AF in every possible aspect impacting patients are needed for further evolving modern and specific diagnostic, therapeutic, and preventive aspects of this disease. Papers addressing these topics are invited for this Special Issue of IJERPH, especially those focusing on either practical approaches or raising new thoughts leading to potential future research.

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (Public Health, Environmental and Occupational Health)
