Deadline for manuscript submissions:
closed (31 January 2023)

Message from the Guest Editors

This present Special Issue focuses on the explanations and predictions of individual and organizational behavior change in the context of carbon neutrality, as well as the challenges and opportunities that may be faced in this process. Through academic discussion, we aim to explore the guiding experience of low-carbon behavior in different countries and regions and different cultural backgrounds. Indeed, determining how to accurately depict the driving law of low-carbon behavior is one of the key issues of common concern in the fields of management science, environmental science, and behavioral science. Therefore, we especially welcome interdisciplinary literary works. Manuscripts can be empirical research, experimental research, modeling research, critical research, and qualitative research from anywhere in the world. Potential topics include but are not limited to:

- Pro-environmental behavior
- Residents' green behavior change
- Farmers' ecological behavior
- Low-carbon travel behavior
- Organizational citizenship behavior
- Climate change adaptation behavior
- Resource and energy-saving behavior
- Stakeholder perspective
- Policy implications

Special Issue

Editor-in-Chief

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.
High Visibility: indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.
Journal Rank: CiteScore - Q1 (Public Health, Environmental and Occupational Health)
