Deadline for manuscript  
submissions:

**closed (31 August 2021)**

### Message from the Guest Editors

Various pests, including arthropods, nematodes, pathogens, and weeds, cause significant crop damage warranting the use of pesticides, among other options, to suppress their populations. With the increased emphasis on sustainable crop production, research on developing various biopesticide formulations and their use in commercial crop production has been gradually increasing in the past few years. While the market for the biopesticides is projected to grow continuously, there is a need for understanding the modes of action of various biopesticide active ingredients, efficacy of the commercial formulations against various pests under diverse farming conditions, their interaction with other farming practices, their storage and handling, as well as their compatibility with other agricultural inputs, and strategies for improving their efficacy.

We would like to invite manuscripts based on original research or reviews of recent developments to this Special Issue intended to improve our knowledge of biopesticides and their role in promoting sustainable crop production around the world.

## Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPus / SciFinder, and other databases.

**Journal Rank:** CiteScore - Q1 (Public Health, Environmental and Occupational Health)
