Deadline for manuscript
submissions:

15 May 2025

Message from the Guest Editor

Human Immunodeficiency Virus (HIV) and its sequelae, Acquired Immune Deficiency Syndrome (AIDS), have disproportionately affected the lives of various population groups, including children and adolescents living with HIV and their families.

This Special Issue of the *International Journal of Environmental Research and Public Health (IJERPH)* focuses on exploring the various negative impacts of HIV on children and adolescents living with HIV and their families, and the factors contributing to those impacts. Original research papers, case reports, reviews and conference papers exploring these aspects will be accepted. This Special Issue also welcomes the submission of articles investigating the development of strategies and interventions to address the impact of HIV on children, adolescents, and their families.

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (Public Health, Environmental and Occupational Health)
