Message from the Guest Editors

Dementia is a global health concern. In 2020, 55 million people were recorded as living with dementia, and these figures are expected to reach 139 million by 2050. Currently, 60% of people with dementia live in low- and middle-income countries (LMIC) and this is estimated to reach 71% by 2050. Most LMIC face great challenges in providing adequate diagnosis, care and support for people with dementia and their families. These challenges include limited public knowledge about dementia symptoms, diagnostic stigma and low diagnostic rates, as well as financial constraints concomitant with demands from other major social and public health problems. and lack of research funding. Even in countries with an established dementia care plan, some minority groups are often neglected.

In this Special Issue, we would like to give a voice to those groups who are neglected in the usual national care plan and research. We call for papers on dementia care (from prevention to treatment, from clinical care to epidemiological or economic analysis) in LMICs and in minority groups in all countries.

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (Public Health, Environmental and Occupational Health)
