### Message from the Guest Editors

Currently, a wide range of patients benefit from rehabilitation treatment, such as patients with musculoskeletal and neurological diseases, older people, pregnant and postpartum women, and athletes, among others.

Despite this, the science of rehabilitation needs to advance in more robust and sensitive topics, such as evidence-based practice and interventions in patients with post-COVID functional limitations. Particularly in the context of the pandemic, many patients have physical disabilities related to “long COVID” or due to prolonged ICU stays.

Thus, considering the interdisciplinarity of IJERPH, we invite all interested parties to submit their papers for this Special Issue, with the aim of offering readers highly scientifically relevant information on new perspectives of evaluation and treatment of the main clinical conditions treated by physiotherapy in the context of rehabilitation.

## Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.

**Journal Rank:** CiteScore - Q1 (Public Health, Environmental and Occupational Health)
