Message from the Guest Editor

Dear Colleagues,

We are organizing a Special Issue on the impact of cadmium exposure in environment in the International Journal of Environmental Research and Public Health. The venue is a peer-reviewed scientific journal that publishes articles and communications in the interdisciplinary area of environmental health sciences and public health. For detailed information on the journal, we refer you to <http://www.mdpi.com/journal/ijerph>.

Cadmium is a heavy metal of considerable toxicity with destructive impact on most organ systems. Its toxicity effects on the kidney, the skeletal and the respiratory systems, and so on. Human exposure occurs mainly from consumption of contaminated food, active and passive inhalation of tobacco smoke, and inhalation by workers in the non-ferrous metal industry. Cadmium Exposure in environment has been recognized as a major public health concern in many regions worldwide. This Special Issue is open to any subject area related to cadmium exposure and public health. The listed keywords suggest just a few of the many possibilities.

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. IJERPH provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

Author Benefits

Open Access: *free for readers, with article processing charges (APC) paid by authors or their institutions.*

High Visibility: *indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.*

Journal Rank: *CiteScore - Q1 (Public Health, Environmental and Occupational Health)*
