Deadline for manuscript
submissions:

closed (30 June 2019)

Message from the Guest Editor

Value in healthcare is defined as the patient health outcomes delivered per monetary unit spent. Quantifying this value requires the measurement and evaluation of both the costs and the benefits derived from the care delivered.

This issue will focus on issues of value for health and social care delivery to older people. Relevant topics may include the definition and calculation of appropriate outcomes that measure value for older people, issues of low-value care, equity considerations, cost-effectiveness, efficiency, and decision-making using value-based care. These may cover interventions in hospital, community, primary care, or residential care facilities.

This Special Issue invites researchers in gerontology and geriatrics, health economics, public policy, and related areas to submit empirical papers, theoretical papers, or systematic reviews relevant to the topic area.

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (Public Health, Environmental and Occupational Health)
