Villejuif, France

Message from the Guest Editors

The aim of this Special Issue is threefold: (1) identifying promising new ways of increasing health promotion factors in order to disseminate evidence-based interventions to promote children and adolescents' health; (2) analyzing mediator and moderator factors, and transferability characteristics, in order to increase the efficacy of health promotion interventions; (3) developing validated tools that enable measuring psychosocial competences, developmental assets and other useful mental health protection and resilience factors in children and adolescents to advance evidence-based research and practice in this field.

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (Public Health, Environmental and Occupational Health)
