### Message from the Guest Editors

The aim of this Special Issue is threefold: (1) identifying promising new ways of increasing health promotion factors in order to disseminate evidence-based interventions to promote children and adolescents' health; (2) analyzing mediator and moderator factors, and transferability characteristics, in order to increase the efficacy of health promotion interventions; (3) developing validated tools that enable measuring psychosocial competences, developmental assets and other useful mental health protection and resilience factors in children and adolescents to advance evidence-based research and practice in this field.

Deadline for manuscript  
submissions:

**closed (30 June 2023)**

## Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

*IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.
