Message from the Guest Editors

The healthcare industry is an aggregation and integration of sectors within the economic system that provides goods and services to treat patients with curative, preventive, rehabilitative, and palliative care. It includes the generation and commercialization of goods and services for maintaining and re-establishing health. The modern healthcare industry includes three essential branches, services, products, and finance, and may be divided into many sectors and categories. The industry depends on interdisciplinary teams of trained professionals and paraprofessionals to meet the health needs of individuals and populations.

The main objective of this Special Issue is to advance the fields of the healthcare industry and innovation management. Thus, papers submitted for the Special Issue should empirically or quantitatively address the valuable implications of the healthcare industry.

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (Public Health, Environmental and Occupational Health)
