submissions:

31 May 2025

Message from the Guest Editor

As Considerable cancer disparities exist, making community outreach and engagement efforts even more critical to ensuring equitable access to screening and care. To reach vulnerable populations, practitioners need to partner with community representatives and trusted organizations to better understand their communities' unique cultures and needs so that materials, programs, and clinical protocols can be appropriately tailored. Further, researchers need to develop strategies to study the dietary, lifestyle, and environmental risk factors and social determinants of health that predispose populations to cancer and to create opportunities to encourage community members to learn about the purpose of research, how participants are protected from harm, and why people of all backgrounds and walks of life need to participate to make research generalizable to all. Finally, understanding the cost of cancer in terms of health expenditure and life loss is crucial in decreasing its full impact. This Special Issue is open to the subject area of community engagement and cancer.

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (Public Health, Environmental and Occupational Health)
