Health Sciences, Hellenic
Mediterranean University, 71410
Heraklion, Greece

Deadline for manuscript
submissions:

31 October 2024

Message from the Guest Editors

It is a great pleasure to introduce this Special Issue entitled “2nd Edition of Epidemiology and Global Health”. In order to improve global health, the United Nations have included a third sustainable development goal that focuses on “Good Health and Well-Being”. The global health community is dealing with many health challenges. The COVID-19 pandemic has made it clearer than ever that collaboration between countries and coordinated work is needed to address health challenges.

This Special Edition aims to present aspects of contemporary health issues in terms of both its epidemiology aspect as well as their general impact on global health. This edition is not focused on a specific geographic area, while the use of both qualitative and quantitative methods is welcome. Additionally, articles that focus on social and cultural determinants of health, on measurement of health status and healthcare systems are of high priority. To some extent, articles that use interdisciplinary approach and aim to change the health behaviour through education are welcome.

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (Public Health, Environmental and Occupational Health)
