Message from the Guest Editor

Dear Colleague,

Digital healthcare is a major driver of innovation, growth, and competitiveness in a healthcare ecosystem. Digital healthcare and its relevant industries are a key source of business dynamics and improvements in the healthcare system. However, recent healthcare performance is far behind in developed and developing countries. The implementation of meaningful advances through digital healthcare innovation will require a number of initiatives, such as promoting a new quality paradigm, synthesizing knowledge domains on ways of preventing social vulnerability, and providing ways to facilitate access to resources by people who need the appropriate healthcare goods and services. The main objective of this Special Issue is to advance the fields of digital healthcare and innovation management. Thus, papers submitted for the Special Issue should empirically or quantitatively address the valuable implications of digital healthcare systems.

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (Public Health, Environmental and Occupational Health)
