submissions:

closed (31 May 2024)

Message from the Guest Editors

Dear Colleagues,

We are organizing a Special Issue (SI) on the new insights in diabetes mellitus. We invite the submission of manuscripts (original research or review articles) about the pathophysiological concepts of all types of DM. In addition, we welcome critical remarks on the current criteria of diagnosis of DM. We want to include the pharmacological and non-pharmacological therapeutic options, evidence-based treatment algorithms, and novel experimental therapies. We encourage the authors to focus on prophylaxis and reducing complications strategies. In the field of environmental research, we seek papers about social, economic, and cultural changes in public health. We call for manuscripts about specific groups of patients, such as pregnant women, adolescents, older patients, and patients with comorbidities. Due to the COVID-19 pandemic, we will publish overviews and meta-analyses about the implication of the viral infection on the course of DM. The latest achievements in molecular biology, for example, assessment of gut microbiome, for this metabolic disorder are anticipated. Papers combining a high academic standard with a practical focus are especially welcome.

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (Public Health, Environmental and Occupational Health)
