Institute of Physiotherapy,
Jagiellonian University Medical
College, 12 Michałowskiego Str.,
31-143 Krakow, Poland

Message from the Guest Editors

Medicine and Dentistry are interdisciplinary sciences that seek solutions to facilitate diagnosis, accelerate treatment and postoperative rehabilitation. The need to eliminate pain and conduct effective anti-inflammatory and regenerative treatment encourages medical professionals to use the achievements of new research fields, such as physical diagnosis, physiotherapy and rehabilitation. Physical medicine is a branch of modern clinical medicine, which has developed thanks to biophysics and electronics, and uses multiple forms of physical and chemical energy of the nature of stimuli, causing specific physiological reactions in the body. Physical medicine is becoming more prevalent in diagnostics and medical therapy. It is not an alternative to essential clinical or pharmacological treatment. However, we can use it to facilitate diagnosis, support basic treatment, maintain therapeutic effects, prevent progression of disease and complications, as well as to increase the body's immunity and compensate for disturbed homeostasis.

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (Public Health, Environmental and Occupational Health)
