Deadline for manuscript  
submissions:  
**closed (31 October 2023)**

### Message from the Guest Editors

Intelligent transportation systems are showing new trends and characteristics, such as vehicle telematics, cooperative vehicle infrastructure system, autonomous driving. Different from the traditional road traffic environment, the perception, cognition, and decision-making behaviors of drivers in the intelligent and connected environment fundamentally change. They present potential opportunities for improved traffic safety, efficiency and energy savings; while the gradual penetration of intelligent connected vehicles also makes the traffic operation characteristics more complicated. Facing the changes in Intelligent Transportation Systems, it urgently needs to research the following issues in this field: analyzing characteristics of travel and driving behavior under the background of intelligent transportation systems, exploring the characteristics of traffic flow and the risk evolution under intelligent transportation system, modeling the impact of intelligent transportation technology on transportation systems; proposing driving behavior intervention and risk control method in the intelligent transportation system.

## Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPus / SciFinder, and other databases.

**Journal Rank:** CiteScore - Q1 (Public Health, Environmental and Occupational Health)
