Deadline for manuscript  
submissions:

**closed (27 March 2023)**

### **Message from the Guest Editor**

Dear Colleagues,

I would like to invite you to contribute to this Special Issue of the *International Journal of Environment and Public Health*. The title of the upcoming issue is 'New Challenges in Gastrointestinal Diseases'. Every day, humans ingest a vast array of chemicals that lead to the toxic injury of gastrointestinal cells, cell aging, and DNA methylation. Indeed, these chemicals can provoke gene silencing or activation, and are a direct cause of disease. However, why these chemicals lead to cancer for some people and not others is a question still under scientific investigation. In line with the aims of the *International Journal of Environment and Public Health*, we kindly welcome all research within this scope.

Moreover, although vast progress in medicine has provided better patient management for many, many adverse reactions and complications still require intensive investigation. This is particularly apparent in pancreato-biliary diseases. Thus, this Special Issue is dedicated to meta-analyses, reviews, and original papers that discuss and consider these issues.

Dr. Piotr Lewitowicz  
*Guest Editor*

## Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPus / SciFinder, and other databases.

**Journal Rank:** CiteScore - Q1 (Public Health, Environmental and Occupational Health)
