

Environmental Determinants of Infectious Disease Transmission and Control in Farm Animals

Guest Editors:

Prof. Dr. Ana María Carvajal Ureña

Departamento de Sanidad Animal, Facultad de Veterinaria, Universidad de León, 24071 León, Spain

Dr. Héctor Argüello Rodríguez

Departamento de Genética, Universidad de Córdoba, Córdoba, Spain

Prof. Dr. Javier Martínez Lobo

Departament de Ciència Animal, Universitat de Lleida, Spain

Message from the Guest Editors

We are organizing a Special Issue on the impact of environmental factors in disease outcome in farm animals for the *International Journal of Environmental Research and Public Health*. Pathogens and infectious diseases are one of the main concerns in animal farming. Disease outcome depends on pathogen's virulence but also external factors will determine the result of the infection. Associated disease factors such as the environment, production system or even socio-cultural features will also impact the outcome of treatment strategies put in place. With this Special Issue, we invite you to submit high-quality original research articles or reviews that provide solid new findings extending the current state of the art.

Deadline for manuscript submissions:

closed (31 July 2019)

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (Public Health, Environmental and Occupational Health)
