Deadline for manuscript
submissions:

closed (1 October 2018)

Message from the Guest Editor

Dear Colleagues,

Nanomaterials have become an integral part of our daily life. Their impact on the environment, human health and the health of other environmental components has been a hot topic of investigation. This Special Issue would like to receive manuscripts on both in vitro and in vivo studies on the toxicity and health impact of nano metals, metal oxides, ceramics, etc. Research on the toxicity mechanisms of nanoparticles is especially encouraged. Studies on the environmental fate and transport of nanomaterials, their use for remediation and environmental protection, water purification, and environmental sensing are also encouraged. We also accept several forms of manuscripts such as reviews, original research articles, and short communications.

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (Public Health, Environmental and Occupational Health)
