Deadline for manuscript  
submissions:

**closed (1 December 2023)**

### Message from the Guest Editor

Dear Colleagues,

Child abuse and neglect (CAN) is a universal health problem. CAN significantly contribute to long-term severe psycho-social health consequences such as depression, withdrawal, antisocial behavior, and delayed emotional, cognitive, and behavioral development. In addition, CAN is a cause and result of family poly-victimization and intergenerational transmission of violence. Developing and disseminating effective interventions and systems to prevent CAN and improve psycho-social health among children and adolescents exposed to CAN is urgently needed. It would protect children's lives and long-term health and avoid violent victimization among children in the next generation.

This Special Issue invites papers that contribute to improving and developing effective interventions and systems for preventing CAN and improving psycho-social health among children exposed to CAN. It includes identifying the health and mechanisms among children and their families at a higher risk of CAN, developing new psycho-social interventions and policies, and scale development relating to this Special Issue.

## Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPus / SciFinder, and other databases.

**Journal Rank:** CiteScore - Q1 (Public Health, Environmental and Occupational Health)
