

Spatio-Temporal Monitoring of Urban–Rural Land Use and Ecological Environment

Guest Editors:

Dr. Jiaxing Cui

Prof. Dr. Jing Luo

Dr. Ying Jing

Dr. Liqun Sun

Deadline for manuscript
submissions:

closed (31 May 2023)

Message from the Guest Editors

To fully understand and find solutions to ecological and environmental problems created by urban–rural developments, it has become an important subject to identify sets of structural and functional indicators suited to detecting ecological environment changes, to quantify the characteristics of urban–rural ecological risks and environmental issues under anthropogenic pressures, and the interaction between the LUCC and ecological environment. With the development of GIS and RS technologies and the broad application of theories and methods of dynamic spatial modelling and simulation, the spatio-temporal monitoring of urban–rural ecological environments is an important research frontier worthy of in-depth study.

Overall, this Special Issue aims to invite manuscript submissions concerning urban–rural ecological environments. The listed keywords suggest just a few of the many possible topics of interest.

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

IJERPH provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (Public Health, Environmental and Occupational Health)
