Message from the Guest Editors

The syndemics in PLHIV impact quality of life and contribute to the economic burden of disease globally. To date, costs directly related to the clinical management of HIV/AIDS are relatively well understood; however, much remains to be studied. We invite papers that discuss the global economic burden of PLHIV in any setting. Papers that discuss collaborations with researchers, patient advocates, and public health practitioners that have implemented and analyzed the cost evidence-based interventions for prevention and treatment are welcomed. Papers or commentaries examining the economic burden of HIV/AIDS, using mixed methods with an emphasis on both direct and indirect costs associated with the disease in various populations are welcomed. We aim to bridge this gap in the literature by taking a comprehensive perspective that incorporates population data to help to paint a larger picture of the overall economic burden of HIV/AIDS.

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (Public Health, Environmental and Occupational Health)
