### Message from the Guest Editors

Electronic cigarettes (e-cigarettes), which were originally developed as a combustible cigarette alternative, have evolved considerably over the last two decades. E-cigarettes are called many different names, including e-cigs, vapes, vaporizers, and e-hookahs, and the technology is now used to deliver more than just nicotine. Pre-made or do-it-yourself e-liquids can contain solvents, nicotine, synthetic nicotine, flavorants, tetrahydrocannabinol (THC), cannabidiol (CBD), alcohol, and herbs, among many other ingredients. The rapidly changing device features and e-liquid ingredients make it difficult to keep up with their potential benefits and harms. Therefore, the public health impact of e-cigarettes and vaping is a dynamic issue that requires timely investigation from diverse perspectives.

For this Special Issue, we invite authors to contribute original research articles and reviews that highlight emerging trends in e-cigarette use, the use of vape technology for non-nicotine substances, and data describing the complex factors that influence vaping and e-cigarette use behaviors, knowledge, attitudes, and health outcomes.

## Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.

**Journal Rank:** CiteScore - Q1 (Public Health, Environmental and Occupational Health)
