Deadline for manuscript submissions:

**closed (30 September 2022)**

### Message from the Guest Editors

One of the key spheres that many studies have marked as a major contributor to road crashes is precisely the human factor, among which psychological issues seem to play a crucial role for both explaining and preventing road causalities, helping practitioners to reduce adverse outcomes in road safety, such as the high burden they represent for healthcare systems, and the injuries and deaths to which road users are exposed. Hence, this Special Issue aims to collect research experiences performed in different contexts that give a significant role to psychological risk factors on road safety issues, serving as the outlet for international relevant basic and applied research in traffic psychology and human factors. Papers addressing the development and validation of new instruments and tools for traffic psychology and multidisciplinary road safety approaches are particularly welcome.

## Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPus / SciFinder, and other databases.

**Journal Rank:** CiteScore - Q1 (Public Health, Environmental and Occupational Health)
